
INTRODUCING A NEW AND IMPROVED ASIA-EUROPE NETWORK

March 2018

Stability for success

All of the moving parts of your supply chain are interlinked and rely on each other. If one element is missing, this has an impact on your business.

When it comes to the delivery of your goods—whether it's a chassis of an auto-vehicle, the zipper of denim jeans or the buttons on a remote control for your television – we have the expertise to keep your supply chain moving.

The new Asia – Europe network will :

- **Enhance reliability** by reducing the amount of duplicate port calls and **allocating more buffer time** around hub ports
- **Maintain competitive** direct coverage between all main markets
- **Create more stability** in your supply chains

“

We are pleased to provide our customers with this revised network,
which will offer a higher level of cargo arrival reliability ”

- Johan Sigsgaard, Head of Europe trades

Asia Europe network in numbers

48

hours

Additional hours of buffer time
in our schedules (average)

115

vessels

Make up the Asia-Europe
network

2

million

Containers shipped every year

Strengthening your choice

Delivering your cargo just got more effective with our new, more resilient network. We are making a significant effort to reduce the tension while maintaining the competitive transit times you need to get ahead.

A more streamlined network

We have created a more stable product for you. The number of port calls per string has been reduced, however, we have maintained direct competitive coverage between all main markets to sustain our offering to you.

Safeguarding your schedules

By adding buffer around ports we know are congested, this will give our network more ability to withstand external events which may cause delay to your cargo.

Balancing capacity

In order to keep your supply chain moving, we have distributed our capacity more evenly to avoid the risks which may delay your cargo.

CONSISTENT

- Connect into our comprehensive feeder network in Western France via Rotterdam as first port of call in Europe on the AE2 and AE5
- Additional buffer in our schedules to reduce disruption

FRANCE

Asia - Europe Network Overview

COVERAGE

- Strong coverage from France to main ports in China, South East Asia hub and Middle East markets
- Opening up new export markets in South China via the AE7 with fast connections to Yantian and Qingdao

DEDICATED
