

## Canada and USA - Canadian National (CN) Rail - Intermodal Operations

Dear ,

Resulting from current labour strike action by members of the Teamsters Canada Rail Conference, Canadian National (CN) Rail is impacted.

During this strike however, please note that **CN Rail Intermodal is still in operation**. All ramps are operating as usual (accepting export loads, releasing of import loads), as well as running all intermodal trains including reefers until further notice.

The only exception at this point is their **service between Montreal and Philadelphia**, which has been **suspended until further notice**.

We will provide you with updates on the strike developments as soon as available. Please appreciate however that this remains a fluid situation, caused by circumstances well beyond our control.

For further information and **to make any changes to your current shipments**, please contact your [local Hapag-Lloyd office](#).

This notice is written without prejudice to or modification or waiver of any terms and conditions contained in Hapag-Lloyd's Bill of Lading, Sea Waybill, Tariff and any other applicable agreement, all of which are fully incorporated herein.

**We are here for you - if you have any questions or comments, please contact your local [Hapag-Lloyd office](#) or send me an [email](#).**

Best regards,

**Michael**
