

Italy - Rail Interruption to/from Genoa VTE Terminal

Dears,

Due to urgent maintenance works on the local rail infrastructures, all **rail moves** to/from Genoa VTE terminal will be stopped during the period from **October 13 to November 3, 2019**.

As the total rail volumes cannot be diverted to alternative ports, the **truck option shall be adopted**.

Since the truck capacity is likely to be under pressure during that period, we suggest to timely contact our [Sales and Customer Service departments](#) in order to identify the most suitable pre- or oncarriage solution for your needs.

For ease of reference, we list below the vessels affected by the temporary rail service closure:
