

## Kuwait - Requirements for B/L Processing

Dear,

It is our constant endeavour to provide you with a high quality of service and we strive to remit to you a fast and clear Bill of Lading Draft.

To accurately process your Bill of Lading faster, it is **mandatory to provide the following basic details** in the appropriate fields of your Shipping instructions:

- **Party Details** – Shipper / Consignee / Notify Party with complete details including Address / City / Country / Telephone number & Email address.
- **Cargo Details** – Complete description for all containers with correct piece count, weight details (Gross / Net) and volume (CBM).
- **Seal** – Seal numbers are mandatory to complete the Bill of Lading and to avoid any additional charges at destination.
- **Freight Terms** – Kindly identify freight terms accordingly as collect or prepaid for all charges including SEA Freight / Destination charges / Origin charges.

In the absence of the above information, there will be a delay in processing your Bill of Lading drafts until all relevant details are properly received.

Please be aware that an amendment charge will apply for any correction request received after 2 days of vessel sailing from the Port of Loading.

We appreciate your business and continued support as we work to improve our business- and service levels.

For further assistance, you are welcome to also contact [our team in Kuwait](#).  
**We are here for you - if you have any questions or comments, please contact your local [Hapag-Lloyd office](#) or send me an [email](#).**

**Best regards,**

**Michael**

from our Customer Communication  
Team
