Low Water Surcharge – Paraguay

Dear Valued Customer

Due to recent low water levels of the Paraguay River, our barge vendors have applied the Low Water Surcharge only for the Northern terminals of Asunción, which are Caacupe-Mi, Puerto Fenix.

Export shipments: Date of shipment at Paraguay as of November 1st 2019

Import shipments: Date of shipment at Buenos Aires, transshipment port, as of November 1st 2019

USD 150/TEU

So far water levels for Southern terminals of Asuncion are still allowing feeder operations and Hamburg Süd will not apply this surcharge. These terminals are Puerto Seguro Fluvial and Terport Villeta. We are constantly monitoring the situation and will keep you informed about the development in case our operation is impacted.

If you require more information, please contact your local sales manager or any of our customer service advisors.

With kind regards,

Hamburg Süd Paraguay
