

MSC RELEASES UPDATES ON EAST-WEST NETWORK

MSC CUSTOMER ADVISORY

Geneva, Switzerland, 20 February 2019

Dear Customers,

As we communicated in our 19 December advisory, MSC Mediterranean Shipping Company is updating its network to better serve shippers moving cargo between Asia and Europe via the Middle East and the Mediterranean. We have now published full details of the first westbound sailings and transit times for the revised network and these are available on our dedicated [East-West Network services page](#).

The objective of the reshuffled network is to enhance schedule reliability and reduce contingencies in those regions to ensure we match our customers' expectations. The implementation of the new network is planned for March 2019 and remains subject to further updates.

Should you have any queries, please contact your local MSC office.
