

# Rail Freight **Info** Eurasian Corridor

**Dear valuable customer,**

A new wave of Covid-19 cases in China's Hebei province triggers transport restrictions.

After Covid19 is heavily back in Europe also China reports cases in different regions, mainly in North China but also in Shanghai region. The province of Hebei surrounding Beijing and the northeastern provinces of Jilin and Heilongjiang have been put into lockdown in recent weeks.

A **limit for both drivers and trucks** to/from/in transit to these regions was imposed. Deliveries by truck have been suspended in Hebei. A **truck shortage** is the consequence.

Furthermore China is experiencing a **shortage of truck drivers** as a result of Covid 19 quarantine and due to the upcoming **Chinese New Year**.

The prolongation of the European lockdown triggers a trucker shortage due to travel restrictions and sick leaves also in Europe.

This trucking shortage both in China and Europe comes on top of the **scarce availability of containers and capacity** and causes thus **higher rates**.

We will do our utmost to ease any impact for you and **will contact you directly for further details**.
