Official Statement on checks to verify export custom declaration

Dear valuable partner,

Over the previous days controls for export custom declaration have been extended. We have worked out checks to verify if sanctioned goods are exported and under what circumstances an export exception can be applied, allowing the transit of sanctioned goods through Russia. Find attached a list of all sanctioned goods and their EU regulation paragraphs (correlation table for sanctioned goods).

Clients need to check the attached sanctions goods table for the following:

1. If export goods HS code is not explicitly named in the correlation table (column d)
 - goods can be exported
2. If export goods HS code matches a code in the table (column d) then look up the EU Codes from column b and check them in the respective [European regulation](#).
 - If the transported goods do not match the description in the European regulation, the goods can be exported providing a statement by the exporter

Example:

HS Code: 3824.99.00 is not given in correlation table (only 3824.99.96) → goods can be exported

HS-Code 3824.99.96 → EU-Code "X.A.IX.002", "X.A.VIII.018.b", "X.C.I.002.c.5" need to be checked in EU regulation → if the goods do not contain the given materials, there is an exception and goods can get exported with statement

DB Cargo Eurasia

Please also find attached the latest version of the export statement.

For all goods mentioned in the correlation table, please fill in and submit the attached statement to your booking party.

We would like to thank you for your understanding and trust in the Eurasian railway solution and will continue support you along the way.

Sincerely Yours,

DB Cargo Eurasia GmbH
