

Eurasia Train Notice Regarding Border Congestion in Alashankou & Khorgos

To whom it may concern,

Please be noted due to the massive potash fertilizer and agricultural products volumes inbound to China since week 37. Both major borders Alashankou & Khorgos are getting congested with limit capacity to handle reloading. That will lead to additional transport lead time for both Westbound and Eastbound train.

The operation lead time at border might be over 7 days, when to recover is still being checked.

Thank you for your attention on above information. We will keep monitoring and posting to you if any further update.
