Re. Important measures – Collect Business

Dear DB Schenker colleagues,

We would like to inform you about the extremely complex situation that Argentina is suffering given that, since last April we have not received any government approvals for the payment of international transportation services and consequently we have not been able to honor our commitments with our foreign subsidiaries.

As a result, as of **September 15th, 2023**, **we are obliged to dismiss any freight payable in Argentina for Air & Ocean Imports into Argentina, and for Ocean Exports from Argentina**. For the time being, Air Export shipments departing Argentina are exempted from this concept and we are accepting them under “upto Airport” terms.

So, until further notice:

- Imports to Argentina are only acceptable on prepaid basis.
- Ocean Exports from Argentina are only acceptable on collect basis.
- Air Exports from Argentina are acceptable on prepaid basis for Incoterm Groups E, F & C.
- Air Exports from Argentina on collect basis are acceptable.

Please note that this status could change in the near future. We are constantly monitoring the situation and if needed, we will provide an update accordingly.

Appreciate your cooperation in this matter and we are at your disposal for any questions or doubts you may have.

Sincerely,

SCHENKER ARGENTINA S.A.
