

Dear Schenker-Team,

There is another update available on our OCS / On-carriage congestion surcharge for CH haulages.

Given the market conditions and competitor moves, we have decided to expire the On-Carriage Congestion Charge (OCS) for North America.

The charge was \$350 per box and was applicable to RAIL/COMBINED RAIL moves. The initial purpose of these charges was to recover a broad range of direct and indirect costs resulting from congestion/disruptions.

We are still facing additional costs for inland business because the dwell times are greater than the Free time granted by terminal operators but we need to follow the pressure in being market competitive therefore we decided to suspend the charge by Jan 15, 2023.

- OCS / On-carriage congestion surcharge for CH haulages will be expired for North America effective **Jan 15, 2023**

Best regards,
