Subject: LCL Groupage measurements (Exports from Pakistan) to Schenker

Dear Schenker Network,

There is normal practice in Pakistan that LCL measurement being charged by all NVOCC & CFS Terminals on next Round off basis.

W.E.F February 1, 2022 we are pleased to inform you that:

For CEI Supply Chain (Pvt.) Limited own / Schenker 'Consol boxes LCL measurements shall always be exact, to the 3RD digit after decimal point. However, CFS charges shall be paid on rounding off CBM measurements.

For freight loaded via a co-load partner, it will still be round up to the next full CBM as all co-load partners as well as external local CFS providers have the same practice when they charge.

Thank you.

Management
