## The Performance of "Full Operation Schedule" Train

## SCHENKER

On October 26, 2022, The first "Full Operation Schedule" (down to minute level) Eurasia train departed out from Xi'an, China. It's the first time Eurasia railway operates with a fixed schedule of each transit stations, including those outside China. This shows China Rail's resolve in terms of "quality over quantity" policy and also demonstrated the future on this corridor.

Highlights:
Departur from Xi'an has always been on time since beginning, the total lead-time has been stable in the past two months.
