The Performance of "Full Operation Schedule" Train

On October 26, 2022, The first "Full Operation Schedule" (down to minute level) Eurasia train departed out from Xi'an, China. It's the first time Eurasia railway operates with a fixed schedule of each transit stations, including those outside China. This shows China Rail's resolve in terms of "quality over quantity" policy and also demonstrated the future on this corridor.

Overall performance has been very stable and satisfactory: China to Germany in <u>12</u> days terminal to terminal, weekly departure and DBS has majority of the capacity on such service.

 2^{nd} WB and the first EB super express train will be launched as of May, we will again receive majority of capacity.
