Your ref. No. dd.

Dear colleagues, partners and customers,

The events unfolding today in the Eurasian space are of great concern to everyone, and we are no exception.

In the current climate of uncertainty and risk, it is vital to support those integration ties and projects that foster trust, partnership, and cooperation among countries.

We believe that the Eurasian transport system has a special role and task – to unite countries, companies and people across our continent. This is a very important and responsible mission for the Eurasian transport industry. Numerous examples of successful cooperation on land, in the air and on the water are an excellent illustration of how our industry can unite and create a successful development platform for future generations.

We clearly see this in the development of our integration project to expand Eurasian transit, to create a strong and reliable transport corridor linking almost all the countries of Eurasia.

We at UTLC ERA JSC have recently received a great number of requests from partners in Southeast Asia, China and the European Union with words of concern and, at the same time, support for our integration ideology and the idea of creating a solid foundation for future growth and development.

I believe it is essential to inform you of the following:

All of our efforts, and those of our partners, are aimed at preserving and multiplying the spirit of partnership, cooperation, openness and trust in order to successfully implement our joint Eurasian project.

We are unable to influence much of what is happening in the world today. Most of us are transportation specialists, engineers and logistics managers. But nevertheless, our joint responsible work and its results would serve as a good

example of our unity in solving comprehensive tasks and contribute to the successful and safe development of our countries!

The bridges, routes and corridors that have been created by us unite the countries of the continent and are our common Eurasian treasure and wealth!

We assure you that, as before, UTLC ERA JSC will fulfil its obligations on developing railway transit services in a reliable and high-quality manner.

We have always counted on your consistent support and efforts to develop true partnership and integration!

With deepest respect and hope to seeing you soon,

A.N. Grom
